

Installation Instructions for Stargazer™ Window Guard, Part # LGWG37

2011 - 2015 Little Guy Teardrop Trailers with the Stargazer window

** Read these instructions before you begin the installation of the window guard. If you do not have the proper tools or do not feel confident to install this yourself, have a professional install this item.*

Tools Needed for Installation

- Isopropyl rubbing alcohol
- Lint-free / micro-fiber cloth

Parts Included:

- 1 Polycarbonate Window Guard
- 28 3M Dual Lock™ coins (total)

*Make sure your window is the right size for this Guard before proceeding.

Window Preparation

Make sure the Stargazer™ window is clean and dry. Use Isopropyl rubbing alcohol and a lint-free cloth (or micro-fiber cloth) to remove all dirt, oil and wax. Allow the glass to dry completely before attaching the Window Guard.

Window Guard Installation

The Window Guard ships with 14 pcs. of 3M Dual Lock™ attached to the "inside" of the Guard. Align and attach the 14 loose pcs. of Dual Lock to the ones on the guard. Place the guard against the Stargazer™ window to get an idea of it's placement BEFORE removing the adhesive backer / protective film.

Once you are certain of alignment and placement, peel the adhesive backer on the Dual Lock, and completely remove the protective film from the window guard.

Carefully apply light and even pressure to the guard, while placing it on the window. Once the guard is in position, apply pressure over each Dual Lock disc to ensure proper adhesion.

*Having the help of another person can make this installation easier.

** To remove the Guard, pull sharply at one of the corners. To re-attach, align the Guard / Dual Lock disc, then press firmly over each disc. An audible "snap" announces that the fastener is engaged

Installation Instructions for Stargazer™ Window Guard, Part #LGWG37

2011 - 2015 Little Guy Teardrop Trailers with the Stargazer window *continued.*

Special Notes:

- Never use paper products for cleaning, or place un-protected guards on the box it was shipped in or scratches will result. Paper towels, paper napkins and even tissue paper will cause scratches.
- First rinse off with clean water and pat dry with a contaminant free damp chamois, micro fiber or cotton flannel material. Wash with a non abrasive soap and clean water. Always use your bare hand to feel and dislodge any caked on dirt or debris. Guards must be clean and free of dirt prior to applying any cleaners or polishing products
- Use only approved plastic cleaning products with contaminant free wipes such as terry cloth, micro fiber, or cotton flannel.
